

Colorado Rifle Club - Long Range Rimfire Match

Match Description:

- This match is designed to be fast-paced, fun, safe, and to challenge competitors' practical field shooting skills. Such skills include rapid target acquisition, magazine and DOPE changes during shot strings, and optionally, shooting from various positions off a tripod.
- There will be no contrived, artificial barricades found at many PRS/NRL-style matches, such as rickety VTAC walls, horizontally suspended ropes, ladders, beach balls and so on.
- There are five arrays of self-resetting steel targets at 77, 150, 200, 300, and 385 meters. (84, 164, 218, 328, and 421 yards). Each array consists of five 1-5MOA targets, with a few smaller.
- Course of fire is six 25 shot strings. Five shots at each distance per string, for a match total of 150 shots.
- One shot per target. One point per hit, zero points per miss. Perfect score is 150 points.
- There is also one 3.5 MOA target at 500 meters (547 yards). *This target is an optional target, at which you may shoot five shots per string, not for score.*
- Competitors must choose to shoot in one of two Divisions: **Prone/Bench (PB)** or **Four Position (4P)**. Each Division will shoot the same COF - with the same time limits - and each Division will be scored separately.
 - **PB** will shoot the match prone or from a bench – shooters' choice. This Division is recommended for novice competitors, those who are physically unable to assume the positions in 4P, and for those who would simply prefer less stress during the match.
 - **4P** will shoot the six strings as follows: 1. Prone Strong Side, 2. Sitting Tripod, 3. Kneeling Tripod, 4. Standing Tripod, 5. Prone Weak Side, and 6. Prone Strong Side. Tripods may be pre-deployed prior to timer start, and *second tripods and/or shooting sticks will not be allowed for rear support*. These shooting positions may be modified by the MD at any time.

Equipment Requirements:

- Bolt action repeater or semi-auto rifle - in .22LR only - with detachable box magazines.
- Magnified optics with uncapped target turrets. Max magnification >12x.
- Scope reticle with elevation and windage hash marks for elevation and wind holds.
- Enough available scope elevation travel and/or holdover values to reach 385m/421y – this is about 22 MILS or 76 MOA in most rifles. (You will need +/- 33 MILS/115 MOA for the optional 500m target).
- 150 rounds ammo, plus what you want to check your zero and DOPE prior to match start. If you plan to shoot the 500m target in each of six strings, add 30 rounds.
- Enough magazines to shoot a 25-30 shot string, e.g., 6x5, 3x10, or some combination thereof. *You will not have enough time to refill mags during your string.*
- Your elevation drop values and wind holds (aka DOPE) for the aforementioned ranges, written down and handy.
- Bipod, rear bag, and/or other positional support bags, based on personal preference.
- Tripod, only if you choose to shoot in the "4P" Division.
- *This is an "Open Class" match, with all rifles competing in the same class, irrespective of the dollar cost or weight of the competitor's rifle system.* This rule may be modified by the MD at any time.

Match Times, Location, and Fees:

- May - October on the 3rd Sunday of each month.
- Colorado Rifle Club, Byers, CO - Silhouette Range
- 0730: Target Setup. Assistance is welcome.
- 0815-0900: Sign in/Check Zero and DOPE.
