COLORADO RIFLE CLUB

September 26, 2015

## FALL WORK DAYS

Saturday and Sunday, October 10th & 11th, are the CRC scheduled fall Work Days. This is the best last chance for members to fulfill their work bond requirement in an organized work setting.

There are a few scheduled matches remaining on the calendar for those who like to serve as a match assistant.

There is much work to do to repair and build target frames along with clean-up and maintenance of range facilities as part of preparing for the winter season.

Simply show up at the Ranch House Saturday and/or Sunday and feel free to bring any tools that you might use for anything special. The club has most needed tools and supplies on hand. Bring a lunch, the club will provide beer and soft drinks.

CRC members must work one day per year for the club, or pay a \$100 waiver. **All work bonds must be completed and work bond cards submitted by October 31.** Contact Dave Paananen at [dpaananen@netzero.net](mailto:dpaananen@netzero.net) with any questions or comments.

## SURVEY PROJECT

A survey crew is preparing to survey and plot elevations surrounding the east range and silhouette ranges on Wednesday, September 30 and Thursday, October 1.

This is being done to give us the data we will need to plan future construction projects and account for the drainage requirements surrounding the area.

The survey crew will spend some time

behind the backstops which will require short cease fires at the those ranges while the crews take their readings, which will be done with computerized GPS equipment.

Please be prepared to stop shooting and observe the cease fire while these people are down range which only be for a short time.
